SUMMARY

Aspiring AI Engineer with hands-on experience in Generative AI, LangChain, LangGraph, and workflow automation using n8n. Skilled in building AI-powered pipelines, multi-step reasoning systems, and prompt engineering. Strong foundation in Python and data-driven applications with a focus on real-world AI solutions.

SKILLS

Languages: Python, SQL

AI/ML: Generative AI, LLMs, Prompt Engineering

Frameworks: LangChain, LangGraph

Automation: n8n (workflow automation, API integrations)

Data Tools: Pandas, NumPy

Tools: Jupyter Notebook, Git

Concepts: Machine Learning (Basics), Agentic Workflows, API Integration

EDUCATION

Bachelor of Computer Applications (BCA) - Data Science

University Of Kashmir

Focus: Data Science and AI , Programming, and Database

CERTIFICATIONS

- Generative & Agentic AI Foundations - AlmaBetter
- Data Science & Analytics Framework - AlmaBetter

PROJECTS

AI Workflow Automation (LangGraph + n8n)

- Designed and implemented multi-step AI workflows using LangGraph
- Integrated n8n for automation and API-based task orchestration
- Built pipelines combining LLMs, tools, and external services
- Implemented state management and prompt chaining for dynamic execution

LangChain-Based AI Application

- Developed AI pipelines using LangChain for data processing and querying
- Integrated LLMs into structured workflows for automated responses
- Applied prompt engineering techniques to improve accuracy and relevance

Data Analysis Projects (Python)

- Performed EDA on real-world datasets using Pandas and visualization tools
- Extracted insights from datasets (14k+ records)
- Built foundational understanding of data-driven AI systems

LANGUAGE

- English
- Urdu
- Kashmiri
